## ЧОРНОБИЛЬ 20 РОКІВ ПОТОМУ

20 років — з огляду на історію, термін невеликий. Але зато вистачило, щоб людство стрімко увійшло у XXI століття, зробило вражачі відкриття, а досягнення новітніх технологій торкнулися майже кожної людини. Фантастично розширили її інтелектуальні можливості, швидко розвинули технології, що відкрили страшної техногенної катастрофи, на початку нової інформаційної епохи.

Варше тема свідомування природи і людини була научно представлена як проста, але не вирішувана парадигма буття — чи не бути.

20 років пост-чорнобильської епохи людство вперто відтворює соціальні проблеми, безоглядно продовжує винищувати свій ареал існування, не усвідомлюючи, що справжній «чорнобиль» тільки починається. Він ще попереду.

## CHORNOBYL 20 YEARS ON

20 years of Chernobyl tragedy are carried on April, 26 of 2006 year out 20 years term. But it was enough for the mankind regarding the world's history is a small to propel into the XXI century, to make amazing discoveries, and to bring the new technologies into everyday life of almost every person, boosting the intellectual possibilities.

20 years is the time past since the first technogenic catastrophe that struck the world at the beginning of the information epoch. For the first time the problem of human and nature coexistence was seen as a simple, yet unsolvable paradigm — to be or not to be.

20 years past Chernobyl, the mankind continues to reproduce social problems, keeps destroying its environment without seeing the real Chernobyl has not yet started. It is ahead.
